Subject: Feedback from EPA in Michigan

Submitted on 01/01/2021 3:15PM Eastern Time

Comments: I think Michigan has way to many injection wells Now. Do we really need any more. The one by me in pinconning They put All kinds of nasty stuff down that pipe now. Hoping it stays down there. If the pump stops Shit will pop back up. Never a good idea to just pump it deep When one of the Great Lakes is just 1/2mile down the road. Very Very bad stuff goes down that pipe.

There has To be a better way to get rid of it. That well I think is 5-6000 ft deep.
